EDUCATION

BSc. Computer Science Engineering

DAFFODIL INTERNATIONAL UNIVERSITY

Teacher Assistant (TA): Digital Marketing

Ashulia, Dhaka | Jun 2024

SKILLS

Languages: Kotlin, Dart, Python, SQL, HTML, CSS, JavaScript

App Development: Native (Kotlin), Cross platform(Flutter)

Technology: Git, KMM, Jetpack Compose, Docker, LaTeX, prisma, Firebase, MySQL, Flame, Flet

WORK EXPERIENCE

ADEMIZE SOLUTIONS | APP DEVELOPMENT INTERN

Uttara, Dhaka | Jan 2024 – Jul 2024

- Collaborated with the development team to design and implement new features for both **Native** (using **Kotlin**) and **Cross Platform** (using **Flutter**), gaining hands-on experience in native mobile development workflows.
- Utilized **Flutter** and **Dart** to create cross-platform components, significantly streamlining the development process for features shared between Android and iOS versions of the app.
- Integrated third-party **libraries** and **Packages** to enhance app functionality, while implementing efficient state management solutions to improve overall application performance and user experience.

NUKE GIZMO | DIGITAL MARKETING AND LOGISTICS

Mirpur, Dhaka | Mar 2020 - May 2022

- Spearheaded digital marketing campaigns across multiple platforms, including **social media**. Resulting in increased online visibility and customer engagement for Nuke Gizmo's gadget offerings.
- Optimized the logistics process by implementing an efficient **inventory management system**, streamlining order fulfillment and reducing delivery times for improved customer satisfaction.
- Developed and executed **content marketing strategies**, creating compelling product descriptions, blog posts, and video content to showcase Nuke Gizmo's gadgets and drive organic traffic to the shop.

PROJECTS

HASHI

FLUTTER, DART FROG, MYSQL,PRISMA, DOCKER

Hashi is a feature-rich social media app developed with Flutter, aimed at fostering connections and building a vibrant online community. It includes user authentication, personalized profiles, a news feed, post interactions, and messaging capabilities, with ongoing improvements and additional features in development.

SHOKHI

FLUTTER, MATERIAL3, GEMINIPro API

Shokhi is a mobile application built with Flutter and utilizes the Gemini Pro API to provide users with an interactive and informative AI experience. Embracing a minimal Material 3 design pattern, Shokhi offers a clean and user-friendly interface for engaging with AI.

BATASH

KOTLIN, XML, RETROFIT, DAGGER-HILT, MVVM

Developed a fully responsive weather app using Kotlin, incorporating the OpenWeather API, Retrofit, and XML to create a dynamic user experience.

2048

KOTLIN, JETPACK COMPOSE, MATERIAL 3, MVVM

2048 is a puzzle game using Kotlin, Jetpack Compose, and Material 3 design. Implemented smooth gameplay, elegant UI, and seamless animations. Showcased proficiency in modern Android development and potential for multi-platform expansion.
